

The classified ad version:

Thriving group optometry practice in Grand Blanc, MI seeks to add Residency-trained optometrist for a long-term relationship. At Grand Blanc Vision Clinic, we practice full-scope medical optometry with comprehensive tech support and the latest technology and equipment, including OCT and automated phoropters with EHR integration. Combine this with a high-end optical dispensary known for having unique eyewear from the world over, and you have a truly special practice opportunity. In addition to our Grand Blanc location, we have satellite locations in Holly (Holly Vision Clinic) and Fenton (Iris Eyecare).

We offer a comprehensive employment package, including competitive pay with full medical benefits, continuing education assistance, 401K with employer match, malpractice insurance and a professional and flexible work environment.

Visit our website (www.grandblancvision.com) to learn more. Send CV and/or please contact DrMiddleton@grandblancvision.com for more information.

The rest of the story:

Founded in 1965, Grand Blanc Vision Clinic is the premier optometric practice in Genesee County, performing over 8,000 comprehensive eye health exams per year. We pride ourselves on offering full scope, medical eye care with in-house OCT, visual field testing, topography and automated phoropters with EHR integration. We also utilize full technician support staff and we have an in-house optical finishing lab. All four of our optometrists are residency-trained – we are not aware of another practice in the State of Michigan that can make that claim. We highly value your Residency training and understand the hard work you have put into it.

Our optical gallery is unique due to the large number frames we showcase (over 1200) and the amazing selection of boutique lines we carry. We purposely seek out frame lines that are unique and interesting, curating an extensive selection which highlights frames from across the globe, including France, Spain, Denmark, Italy, the United States and many more. We are known as a destination optical for people who seek unique eyewear, and we utilize only the very best ophthalmic products, including digital progressives and top tier coatings.

As employers, we try hard to have a family style work environment where you are respected and appreciated. We have over 25 employees and have very little staff turnover. We understand that you have a life outside of work and always try to take

your needs into consideration. We take four-day weekends off on major holidays (Memorial Day, July 4th, Labor Day, Thanksgiving and Christmas).

Grand Blanc is a wonderful community with first-class schools, located right off I75, one hour north of Detroit and 30 minutes North of Auburn Hills. We have a large and loyal patient following, sometimes spanning three generations of family members.

We have recently expanded our practice to include satellite locations in nearby Holly and downtown Fenton. We are a growing practice – it's definitely an exciting time at Grand Blanc Vision Clinic!

Holly Vision Clinic brings an individualized optical experience to the residents of Holly. With custom-built, one of a kind frame boards trimmed in knotty pine, HVC has a unique, rustic look and feel that really sets it apart from the competition.

Located just South of Grand Blanc, Holly is also convenient to I75 and the northern Detroit suburbs. As well as having a quaint downtown, Holly is home to the famous Michigan Renaissance Festival.

Our newest location is Iris Eyecare, located in the heart of downtown Fenton. Fenton is one of the hottest and fastest growing communities in Michigan. Business in the beautiful and charming downtown area is absolutely booming, with many boutique shops and unique restaurants opening in the past few years.

Iris Eyecare was specifically designed to compliment Fenton's unique and eclectic downtown. The decor is first class, with luxury seating and chandelier lighting, all in a downtown space with trendy interior brick and classic downtown storefront windows. With an expansive selection of luxury eyewear and a boutique feel, Iris Eyecare is like no other optical in Michigan. Our collection includes many niche frame lines, such as Bellinger, LA Eyeworks, Blac, Caroline Abram, SALT and Costa.

Please take a moment to browse the photos below to get a feel for what we are all about.

Now that you know what sets us apart, we are excited to speak with you and find out what sets you apart from your colleagues. We seek a long-term relationship with a Residency trained optometrist such as yourself, and feel like we have a lot to offer. Please send C/V and/or contact Julie at DrMiddleton@grandblancvision.com for more information.
